

Mango Languages Product Accessibility Policy

April 2017

Mango Languages is committed to creating and delivering products that are accessible to users of all abilities.

The majority of products within the Mango Languages suite of learning applications conform with key federal standards for compliance as defined under Section 508 of the Rehabilitation Act. Because we feel strongly about ensuring the best possible user experience for all users, we are in the process of improving our applications to meet both Level A (Priority 1) and Level AA (Priority 2) success criteria (when/where applicable) as defined by the Web Content Accessibility Guidelines (WCAG 2.0). In order to maintain adherence to these requirements, we have partnered with [Access Ingenuity](#), a consulting company that specializes in accessibility within digital products to assist us in the design and development of new products. Access Ingenuity is also working with our product teams to update existing products to meet these new WCAG 2.0 access criteria as well as the Section 508 standards.

Access Ingenuity incorporates extensive use of user based screen readers and low vision accessibility testing to ensure that applications are accessible to those users with disabilities. While we strive to maintain consistent alignment with these standards across all of our products, there are some components of our applications that are more difficult than others to achieve full compliance. Because our goal is to achieve 100% compliance up to WCAG 2.0 in all of our products by the end of 2017, we're working with Access Ingenuity to determine alternate methodologies to provide our users with the same high quality experience we strive to maintain throughout our suite or products. We also welcome feedback from users with disabilities and will strive to enhance the accessibility of all applications based on user feedback.

Current Product VPAT Status

Mango Languages iOS App - Section 508 VPAT

Mango Languages Android App - WCAG 2.0 VPAT

Mango Languages Desktop - Section 508 VPAT

Mango Languages Website - N/A
